Corn Led in Point of Weakness and Lost Most in Price, but Wheat at in St. Louis.

Corn Led in Point of Weakness and Lost Most in Price, but Wheat Was Not Far Behind.

Office Republic.

Tuesday, Sept. 4, 1993.

The local speculative grain markets, after two days of enforced idleness, due to Sunday and Labor Day celebration, opened up the new week this morning in a very quiet and doubtful manner, it being a rather difficult thing to pick the winning side for some considerable time after the opening. Pit trading, after the first little flurry, when business opened up, was of a slow, draggy character, and no special features were shown. There was no stir or movement of significance to prices, such changes as occurred being confined to extremely narrow limits for some time. The different markets developed nothing of real importance until well after the hour of noon, when they got something like a move on them, though it was not the kind of a move that the trade would have liked to see, for the reason that the early undertone of weakness became more pronounced, and prices, which were a little bit lower than last Saurday's, lagged further and further behind. During lagged further and further behind local militers anything to concede to see, further and further behind local militers anything to concede to see, furth

the early undertone of weakness became more pronounced, and prices, which were a little bit lower than last Saturday's, lagged further and further behind. During the latter part of the session the tendency was almost whelly one way, there were no recuperative powers, and at the close prices were found to have lost largely, closing at or near the bottom for the day, whent showing a loss of the to the control of the day, whent showing a loss of the to the control of the day, whent this morning, there being some very strong statistical information received shortly after the opening. There was also some that the two days' rest had developed a weaker undertone, and it was shortly made evident that the situation was more disposed to respond to the latter than the former. There were signs of weakness and lack of confidence early in the day, but the run of news was such as to hold the downward movement in check for a time, and the opening loss was small.

Market cables were not as conductive to

news was such as to hold the downward movement in check for a time, and the opening loss was small.

Market cables were not as conductve to strength as traders expected, there response to our strong and higher closing Saturday not being near up to expectations, nor did they appear to be affected by the statistical situation, which was very bull-lish. Both Liverpool and London were quiet, and the first named, though it recovered yesterday's hid decline, was still hid lower than Saturday. On the other hand, the cabled statistics were of the best. In the first place, there was the annual report of the Hungarian Minister of Agriculture, which showed a deficit between supplies, including crops grown this year, and reserves on hand at the opening of the crop year of 65,500,000 bu. In yea and an excess of 6,000,00 bu. In wheat, indicating a deficit of 4,500,000 bu. In wheat, indicating a deficit of 6,500,000 bu. In the two principal grains of the country. Following this came a report that the amount affoat had decreased 1,440,000 bu., but the world's shipments were 6,668,000 bu, as against 5,700,000 bu, the week before, which increase was due to larger Black Sea shipments. Under ordinary conditions the above would have started off the market with a bulge, but when traders were confronted by the postings of receipts at primary markets, they hestiated. The arrivals were for three days, and were backed up by reports that farmers were selling freely, and that hardly any of the winter wheat in the Southwest had been moved, brought a feeling of weakness that was never recovered from. According to the figures posted, the receipts at St. Louis, Kansas City and Chicago were 250,000 bu, city,000 bu, and 778,000 bu, respectively. Receipts in the Northwest were no larger than a week ago, but shipments from all points were very heavy.

As a result of the conflicting advices noticed above, the opening was more fa-

than a week ago, but shipments from all points were very heavy.

As a result of the conflicting advices noticed above, the opening was more favorable from a bear point of view than a buil's. Still, the buying was sufficient to cause traders to pay 14½c and 14½c for Dec., the latter only being 1-1½c off from Saturday, but on advices of declines at other points, there was a let-down here, and that option fell to 74½c in no time, and was offered at 74½74½c, which proved to be the low price of the day. In the meantime Sept. opened and sold ½c lower, at 71½c, opened and sold ½c lower, at 71½c, only over 4c since last Friday's close, and Berlin was 1½c better for the day. Liverpool closed ¼d lower, Duda-Pesth ¾c off and Antwerp unchanged. The outward movement for two days from the seaboard was large, at £1,000 bu., flour and wheat, and the visible showed a decrease of 22,500 bu, which was less than had been anticipated. The latter seemed to give confidence to traders, and Dec. advanced to 74½c and Sept. to 71½c bid. By hard work, the buils managed to get Dec. up to 4½c, the licentive being a report that 29 imads had been taken for export, but speculation was light and narrow, and the buil sentiment had fallen off largely. Then there were declines at New York and Chicago, owing, it was claimed, that a well-known St. Louis The produce markets we to-day, but prices as account of the heavy regold buyers, and there were declines at New York and Chicago, owing, it was claimed, that a well-known St. Louis offerings were heavy. Potatoes were weak and by the price and the visiting of the first welling at 72½c to 72½c, closed ½c lower for the day, at 73½c bid.

The market for corn to-day was an insignificant affair, and as compared with that of the price of the fact.

The market for corn to-day was an insignificant affair, and as compared with that of last Eaturday, ahows a very material declaration of the declaration of the weekness and dephreside of the wee nificant affair, and as compared with that of last Baturday, shows a very material de-cline in prices. It was also a dull market,

TOTAL THE PARTY OF THE PARTY OF

BEARS CONTROLLED GRAIN MARKETS IN CHICAGO.

Dats were well held, considering the weakness in other grains, and the heavy accumulations of receipts since Saturday. Oct. oats, which were worth 13%c at the termination of the previous week, started this morning from 21%c/bc, and worked down to 21%c at the close. Receipts, 1.69% cars, as against 574 last year. To-morrow a receipts were estimated at 570 cars. The visible increase was 1.155.000 bu., making the total 9.23,000 bu., against 5.685.000 bu., making the total 9.23,000 bu., against 5.685.000 bu. a year ago. The senboard clearances were \$2,000 bu. A good shipping demand was reported, but no particulars given of the amount sold.

Rye.

The rye market ruled a little easier at 1.671%c lower, in sympathy with the weakness of wheat. Offerings were somewhat heavier than they have been of late, too much so for the tame demand that existed. There was no demand for spot reported. Receipts were 29 cars and shipments 1.564 bu. There were no exports out of New York. Sept. closed at 51%c. Oct. 51%c. Dec. 53c bid: No. 2, f. o. b., sold at 52%c, and No. 3 at 501%g51%c.

Barley.

The barley market was reported unchanged, under a good demand and light offerings. Receipts were 77 cars, a triffe heavier than they have been recently. Shipments amounted to 13.459 bu. The amount in store at present aggregates 17,000 bu.

Futures and cash seed were both strong and from 11%c to 2c shove former quotations. This big advance was said to be caused by an excellent foreign demand and light offerings. There is at present 27,715 bu. of laxsoed in store in Chicago elevators. Receipts 118 cars, compared with 214 cars a year ago.

Timothy agric was weak and 1%c to 10
